

# Mealybug Outbreak

# Mealybug Outbreak

## Main Cause

1. Abnormal weather condition. Pest breeding exponentially
2. Use animal origin product, attract more pest invasion

## Recommended Treatment/Precaution

1. Avoid using of animal origin product
2. Apply pesticide with active ingredient of **Abamectin** or **Imidacloprid** or **Dimenthoate**
3. Alternate use of pesticides to avoid resistance
4. The waxy outer layer of mealybug body is water resistant. Adding of surfactant into the mixed solution be more effective.

Purpose	INOGuard Dilution	Pesticide Dilution	Water	INOGuard	Pesticide	Surfactant
Inhibition	1:1000	1: 1000	20L	20ml	20ml	√
Purpose	SNP Dilution	Pesticide Dilution	Water	SNP	Pesticide	Surfactant
Prevention	1:250	1: 2000	20L	80ml	10ml	√
